10. Other:						
						

Continuation Sheet (PTOL-303)

Continuation of 2. NOTE: The proposed amendment filed 7/16/04 will not be entered since it raises new issues that would require further search, for example, wherein each of the two short device edges is substantially closer to its parallel substrate edge than each of the two long device edges is to its parallel substrate edge such that there is more space on the substrate between each of the two long device edges and its parallel substrate edge than between each of the two short device edges and its parallel substrate edge for receiving the two parallel sidewalls of the heat spreader. Therefore, all claims are held prima facie obvious over the cited art of record.
